

ArchiCAD 6.5R4 Teamwork Dongle

BRAKENSIEK®
SYSTEMHAUS

ArchiCAD 6.5R4 with Teamwork additional option for PCs

the version ran under Windows 2000. I have not tested other systems.

Non-new

The program of the builder-owners and architect, to create a virtual building. The whole project is grasped in the computer. To work the default, with 3-dimensional elements instead of looking at the PC as a digital drawing board, offers an amount of advantages.

The low additional expenditure in the input offers the possibility to evaluate nearly all necessary data from the project. Thus can be called away any time all plans, cuts, views, details, visualisations and animations. In addition, stand a huge number of evaluation possibility like space lists, surface arrangements, window or door lists, mass inquiries etc. at the possession. By the direct work on the virtual building all data remain always topical. Thus becomes every change no matter whether in plan, cut, view or 3D updates immediately in all other areas. Optimised interfaces are available for the wide use of the won data for construction physics, Facility management or to other CAD systems.

- 1x copy of the Democd to measuring was distributed which becomes by the Dongle the full version: ArchiCAD Teamwork 6.5R4 with PDF to manuals in in German

- Teamwork is an additional functionality, it the work in the team in a project allowed)

- It concerns no first licence. but presumably around 40th licence. It is 1 Dongle, besides, with the above standard number. The Dongle fits on you presumably only if you already 39 Archicad licences own. We have bought this from a bank.

- there is a version 8 or more anew from Archicad, I deliver only version 6.5 which is called by many users worthless.

- The price per Dongle is 800 EUR. The buyer must pay the registration fee in Graphisoft if he updates plus costs if he as \ " Not place Mehr \ " would like to use plus update costs.

There is present only the CD and the Dongle. The software can be installed and runs. On the CD all manuals as a PDF are a file on it. I print out that so that that as a laser expression in another slipcase, besides, sin. While starting the additional licence terms on the multiple licences which the user must recognise with starting the program every time are indicated. If he offends against the licence terms, the buyer may not use the program.
