Program name: Version LOGOCAD TRIGA: 3.x

The innovative 3D-CAD Solution with drawing production appropriate for norm

Program description:

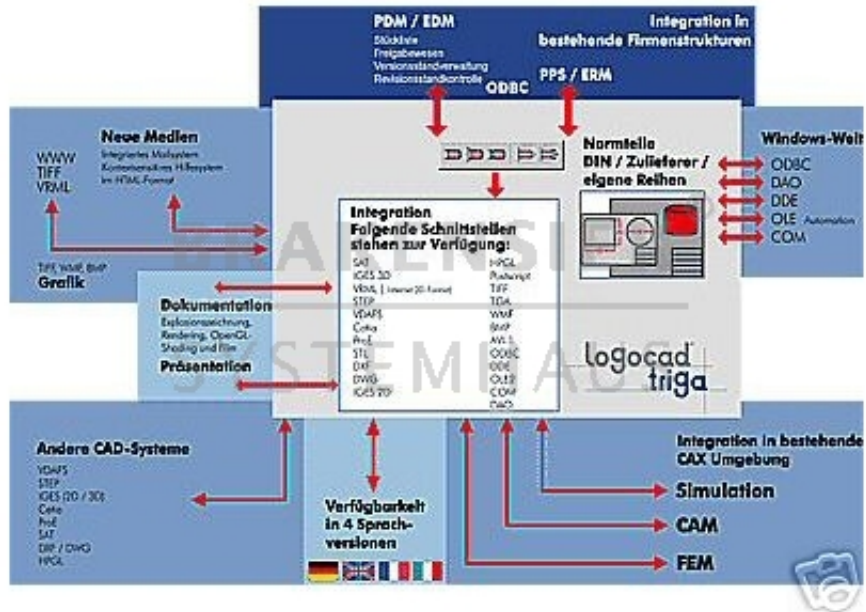

The professional 3D-CAD-Lösung with drawing production appropriate for norm distinguishes itself by especially comfortable user guidance and by vollparametrische, teilparametrische or free approach in the construction. Particularly LOGOCAD TRIGA is suited for constructions with big components or geometry and with complicated product structures in the mechanical engineering, special mechanical engineering, investment construction and apparatus construction, industry and steel and metal construction etc.

By the respectable ACIS platform oriented to future, by numerous interfaces and by the MS-Windows-NT-Plattform LOGOCAD TRIGA is for the data exchange in heterogeneous CAD sphere and in the Winwows world openly in all directions.

Numerous additional modules as for example 3D-or norm parts 2D and norm alien, a FEM module or numerous other additional applications complete the solution.

With the integration of PDM/DDM 9000 there is an integration at the highest level with an engineering management system. Not only representations are available for the presentation of your constructions in the wire model or Shading or near to reality gerenderte picture possibilities. More persuasive than pictures are moved pictures. Therefore, you can generate with LOGOCAD TRIGA for especially high claims moved pictures in the AVI format and bring forward your customer. A wandering by the model as a film makes shown customers from your prospective customers."

We have no Logocad Triga full versions from version 4.1 or, nevertheless, higher are interested urgently in the buying!
