Craydon Administrator, deutsch/englisch

In this new version, we have included some of the most important features to assist those managing networks to work more efficiently, while greatly increasing time management. Some of these features are Local Firewall, an intrusion detection system, Worm Capture and the Net Optimizer.

Take advantage of the abundance of tools and utilities gathered in this application to ease your administrative responsibilities. It has all that you need to manage, secure and optimize your network servers and PCs. You can manage up to 1000 PCs, servers and printers and up to 64000 network users from a single workstation.

Administrator is a network and systems intelligence management solution, designed to meet the specific needs of small to midsize networks with 5 to 10000 computers. Its unique design offers a powerful network management right out the box. Setup is quick and easy to perform without training or configuration requirements. It is priced in such a way that small to midsize businesses can afford and can be purchased for less than the cost of 10 hours of managed services.

Administrator automatically discovers and maps all network and system elements; preemptively identifies potential problem; provides graphic alerts, monitoring and notification; and generates reports with a wealth of strategic information. Administrator Client runs in the background using a minimal bandwidth to provide a dynamic and current inventory of network infrastructure assets.
