Apple Mac OS X 10.4 tigers

We introduce: the worldwide most advanced Apple operating system. Find exactly that what you look for. Receive information by mouse click. Construction, discover and transmit – Mac OS X tigers makes possibly easy to find everything on your computer, to use, and to enjoy. Update your Mac!

Revolution on your desk

Mac OS X tigers will change the way in which you use a computer. A pioneering searching technology, fantastic graphics support and media, unprecedented Konnektivität, an intuitive user interface and a tool palette with a huge number seamlessly of integrated functions offer you in combination with the reliable basis UNIX the most innovative, most stable and most compatible computer operating system without if and, however.

Everything find rapidly quick

Tiger encloses Spotlight, the rapidly quick searching technology which analyzes every corner of your Mac and already indicates searching results, while you give them. If you search and find everything on your whole system: Files, e-mails, contacts, pictures, films, calendars and programmes are immediately indicated. As well as you can find songs in iTunes with the help of the title, interpreter or album, also offers you Spotlight far more than only file name and memory places: They can find all Metadaten in the files. If there belongs to it, e.g., the kind of the contents, the authors, the treatment statistics, format, greetings and many other details.

Effortless management

Because Spotlight is integrated directly into the core of Mac OS X, the results are automatically updated, as soon as files are changed. To you varied new possibilities come up with it for the management. They can protect searching results, for example, as an intelligent folder which updates itself automatically. Furnish intelligent post office boxes based on Spotlight searching inquiries and the programme "Mail" files your news accordingly for you. Provide help of Spotlight to searching results intelligent groups in the directory. The chief attraction: Searching results from Spotlight move even in new Automator work routines to automate recurring duties simply. Thus nothing more remains on your Mac concealed.

Information with Dashboard

The new Dashboard provides practical miniprogrammes which are also called Widgets. These are indicated immediately and supply you with topical information from the Internet. Indicate share courses or the topical weather report, find out about flight data, convert currencies and units or look for enterprise in the yellow sides. Like plan is faded in the Dashboard by pressure of a functional key on the desk. Their most popular Widgets provide quick as a flash the most topical information and are faded out as fast and simply again, so that you can turn again to your other duties.

Communication at all levels

With tiger your Mac becomes the communication heave. Safari RSS for tigers automatically finds RSS-Feeds and indicates this. Mail and the directory use the Spotlight to technology to support you by the management of your contacts and correspondence. And with iChat OBV. you can hold video conferences or audio-chats with friends and colleagues or send telegrammes. With a.Mac account you can use all Konnektivitätsvorteile of tiger optimally. They receive with it iDisk mass memory, a mac.com e-mail address, your own web page and highly competitive functions for the synchronisation.

VoiceOver keyboard control

If you work on your Mac with the VoiceOver technology, use instead of the mouse your keyboard. They can select any row of key combinations and short orders and use even the advantages of the Apple to function keyboard control. With the keyboard control you profit from more access possibilities.

Perfect cooperation

Another plus of Mac OS X tigers: better compatibility than every other operating system. Use files together with Windows to users, produce connections with every network and communicate with the help of the Bonjour technology with other Macintosh computers. Also with different users OS X tigers turns out Mac extremely

compatible. VoiceOver and the function service facilities support people with impediments with the use of a computer, while Mac OS X gives parents more possibilities to the hand for families to steer the computer use through her children. And thanks to the stable basis UNIX tiger also owns a highly competitive security architecture which protects your data against curious looks.

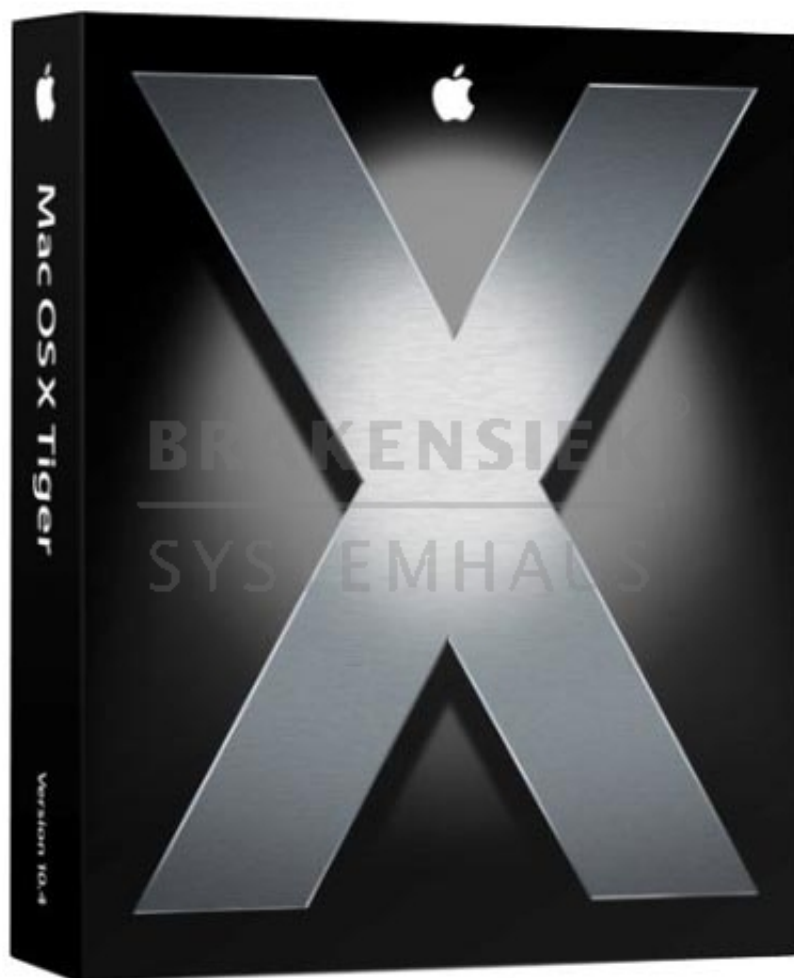

See the difference

From the Quartz based on PDF Compositing system for QuickTime 7 with the high-quality H.264 Video-Codec up to the ColorSync, Core audio and Core image one succeeds Mac OS X tigers in defining desktop graphics and media absolutely anew. It plays no role, whether provide you audio and video, develop or just enjoy – tiger is for it the ideal partner.

Make everything

Experience Mac OS X tigers and see how this operating system will change the way in which you use a Mac for work, play, search and Teamwork. They need something and cannot find it? Spotlight provides for the fact that unsuccessful searches of the past belong. They believe, you could write no automation script? Then you test Automator and are surprised. They would like to transmit media to your family and friends? Also for this tiger is equipped with the suitable functions which make this possibly easy. For every reason for which you use a computer tiger offers a useful function – and still some more.
