Software 4.02 C.A.S.C.

scope of delivery of the operating unit:
PowerMacintosh with CASC Board and 2 dongles.

Incl. 1 mount station and 2 CASC drums

CELSIS 5250/6250 CASC THE ULTIMATE IN HIGH - PRODUCTION AND VERSATILITY

The Celsis 5250 and 6250 are versatile scanners with applications ranging from quick turnaround catalog work to fine art reproduction. For unprecedented simplicity and productivity, Fujifilm's CASC (Celsis Advanced Scanner Control) offers the ultimate in versatility. Once the scanner drum is loaded with up to 150 originals, a single keystroke initiates the "Autocrop" sequence which automatically finds, crops and ranges every original on the drum. The operator need only specify the final size, format and destination folder for each job to complete the process. Fujifilm's optional C-dot upgrade has been developed to provide users of Celsis 5250/6250 CASC scanners with high quality dot-for-dot scanning and separation descreening solutions without the additional expense of a dedicated copydot scanner.

CELSIS 5250 CASC FEATURES

- Celsis CASC 4.02 software.
- Default settings help produce high quality results from the most difficult of transparencies.
- Surpasses limitations of other scanners with high performance optics and interpolation techniques.
- 20" x 28" scanning area accommodates large-size originals or many smaller originals.
- The Celsis 5250 is designed as an entry-level mid-range scanner, fully upgradeable to Celsis 6250 capacity.

OPT I O N S

- C-dot upgrade for separation scanning.
- C-dot SP for off-line processing.

I am looking for the following service Manuals for Fuji Celsis Drum Scanner

Documents Required:

Celsis 5250/6250 With C.A.S.A Pre-installation Manual # 67006840
