Brakensiek System GmbH & Co. KG is a distributor for all products, as well as exclusive distributor LaserSoft Silverfast for Topaz, SilverFast for Nexscan, Silverfast for S3300, Silverfast for S3400, Silverfast for Tango.

The award-winning scanning software SilverFast from LaserSoft Imaging, Kiel, is now verfügbare for High-End Scanner & Mac OS X Tiger.

SilverFast Ai Studio for Heidelberg High End scanners, it makes it possible the full dynamic range of its hardware into TIFF-data write. Thus, the negative reduction to 24 bit RGB obsolete. To save the way of holding the raw data and the SilverFast HDR STUDIO weiterzuverarbeiten eröffnet völlig a new workflow.

With SilverFast Ai STUDI, the full dynamic range of the hardware (3x16 bit = 48 bits) are written to the TIFF data. A computer with dual core processor is recommended here. The ability to store raw data and processed by SilverFast HDR STUDIO further opens up a whole new workflow for maximum quality and productivity. Chromagraph and Linotype-Hell Topaz scanner supports 3240-I, only the scan mode, 36 bits to 24 bits because they scanners scan with 3x12 3x16-bit, no bit = 48bit can transmit.

Important features:

NEW: Fully Automatic IT8 Calibration

With the new version of SilverFast can also be private and professional users to concentrate fully on the correct colors and neglect the sophisticated technology behind it. Simply by the scanner is first calibrated.

The combination of automatic discovery and the context of the integrated bar code technology in LaserSoft Imaging IT8 targets the entire calibration process verläuft completely automatically.

A pre-scan is not required.

Just the original LaserSoft Imaging IT8 target placed on the scanner and start the IT8 calibration process.

Start the workflow for digital imaging with an optimal color reproduction ensures maximum color quality for output.

IT8 Targets

The high quality IT8 targets - both incident - as well as transmitted light targets - makes LaserSoft Imaging IT8-production on its own. With small lot sizes is secured the highest precision.

In the SilverFast IT8 targets and patent-pending integrated bar code ensures that the reference data is identified.

New: SilverFast car frame alignment and free rotation

Especially if you are a lot of different templates on the scanner, the car can frame alignment in combination with the automatic frame detection, the templates in one click now not only automatically and framing, but the images are aligned even automatically at right angles .

These tasks are now easily handled by the intelligent algorithms for detection and alignment of the frame with the utmost simplicity. In addition, the framework for the purpose of fine-tuning are simply rotated manually at any angle. The car frame alignment has been specifically designed with a very simple, convenient and time-saving scanning experience in mind.

New: An automatic color cast removal (CCR) in NegaFix

An automatic color cast removal (CCR) was all new SilverFast hinzugefŕgt versions, which contain mandatory NegaFix. With this enhancement, it is possible to achieve even color cast-neutral results. The handling is easy and is very easy by clicking the checkbox in the CCR NegaFix dialog as shown below

New: Improved descreening

SilverFast has a new descreening vollstŕndig to remove the dot printed images. The newly developed descreening in SilverFast is able to scan the pattern of the template to recognize selbstŕtig.

There are 4 types of descreening made available:

- Auto descreening
- Car-intensive descreening
- Descreening
- USM & Descreening

Auto and auto descreening descreening are intensive full-automatics.

Customer testimonials:

Robert D. Vernon: I need a consistent, predictable and reliable solution. SilverFast meets these requirements.

Ricardo Barros: Since 2001 I have been working with SilverFast. It was at the time the best software that was available. Since SilverFast has always gotten better.

Paul Sherr: After buying a scanner with SilverFast and work is a whole new world! I can be as flexible working, as I would have never imagined.

Felix Gatt: I recently upgraded to version 6.5 and am amazed at how SilverFast works with CS3.

Paul Butzi Photography: What a fool I was. How much time I could have saved. Now I just scan with SilverFast.
