InkZone Box

Feed the press!

InkZone Box also uses DI-Plot for calculating ink zone setting values on printing machines. Either CIP3/4 files or direct InkZone files can be generated from InkZone. InkZone files are input into the InkZone Box via Ethernet. After release of the required job via touchscreen, the files are written to the printing machine data carrier in the required format (e.g. Heidelberg's Chipcard; MAN Roland's Jobcard; KBA floppy, etc.). Both DI-Plot and the InkZone Box support hotfolder technology for automation of sequences.

SYSTEMHAUS

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
