The camera for professionals

Sensor

The Canon CMOS sensor with approx. 8.2 tommy guns provides for excellent contrast reproduction and the finest details in lights and shades. An integrated deep passport filter and switching circuits on the chip suppress false colours and picture rushing.

Up to 8.5 pictures per second

With a standard picture frequency from up to 8.5 B/s are possible up to 48 big JPEG-compressed pictures or up to 22 RAW-compressed pictures.

Autofocus

45 measuring fields AF grasp a big area of the picture field for stung sharpness picture for picture, even with external-concentric arranged or fast moved objects.

DIGIC II

The DIGIC II processor returns colours and monochrome tones with unusual exactness. In addition, economically in the energy consumption and quick as a flash, the DIGIC II processor optimises the battery achievement and allows the quick start in only about 0.2 seconds.

Picture style

Picture-Style-Presets simplify the control of the picture treatment parametres and the application of the black and white function. Each of the Presets a different colour rendering - proves possibly in such a way as in the analogous photograph different film types are used to the achievement of certain results. Sharpness, contrast, tone and saturation are adjustable in every fixed value.

Big LCD screen

The bright, 2.5-inch-LCD screen with 230,000 pixels permits consideration corner to 85 in most directions.

Double map slots

RAW-and JPEG-compressed pictures can be written apart on CF or memory maps SD. With storage on only one map a short order permits the quick change-over on the next map, as soon as the first one is full. For the transference of the shots to other cameras these can be stored on the map.

Big delicacy area

The settings Low (L: ISO 50) and High (H: ISO in 3200) extend the standard area of 100 - in 1600 ISO. With the

change of the ISO setting the options are indicated in the seeker.

Hard in taking

The robust, weather-protected case from a magnesium alloy contains more than 70 poetries for the protection from humidity. The fastener is laid out for a life span by at least 200,000 Auslösezyklen.

Digitally photo professional software

The Digitally photo professional software permits the quick treatment without loss of RAW-compressed pictures.

Options and compatibility

EOS-1D Mark II N is compatible with all Canon to EF objectives (except EF page objectives) and the Speedlites of the ex-row. E-TTL II provides by transmission of the distance information to the flashguns for highly exact flash exposure. Of the Wireless available as accessories file Transmitter WFT-E1 permits a picture data transfer without cable, Video-out the reproduction on a television screen. Over the FireWire connection (IEEE 1394) is possible of quick Upload of data, above the USB interface the direct expression about PictBridge for compatible printers.
