Überlegene quality while monochrome scanning and Monochrom copy

The CHAMELEON 25 BASE scanner reads in grey tones with 16 bits and transmits the best 8 bits and the calculator to generate exact grey steps. Both CHAMELEON 25 models use completely digital cameras, with integrated digital conversion which guarantees minimum rushing and an enlarged, dynamic area. These scanners support the newest monochrome scan technology with 2D-adaptive picture improvement which works simultaneous on background, foreground and edge emphasis, so that you can provide always clean, sharp Scans, even from bad originals.

Living colours with the CHAMELOEN 25 PLUS

The high final model CHAMELEON 25 PLUS disposes not only can separate about the monochrome abilities of the BASIC of model, in addition, also pictures in brilliant, photo-realistic colours generate. The scanner reads in the colour data with 48 bits and passes on of it the best 24 bits and the calculator. In connection with 25 "large format plotter you have the perfect digital photocopier in the hand. Thanks to the high precision with the capture of colours and details you can scale your creations without high-class loss on full poster size. High-quality, colour-conformist fluorescent lamps guarantee the highest colour exactness.

Colour precision

The Context-colour scanners can be calibrated by the user on colour issue after international standards (NTSC, sRGB colour rooms). The Precision Color unique for large format scanner system allows to you any time to calibrate the plotter and to provide thus for stable and predictable colour issue.

Automatic scanner servicing

The CHAMELEON was so constructed that you can count on the fact that he optimally works, while you completely concentrate upon your work. The 3C built-in in the scanner Auto-Maintenance selfservicing system provides for the fact which the cameras are aimed always optimally, are adjusted and calibrated. If the scanner has become once eingestellt, he carries out a number of operations automatically and takes from you thus the tiresome routine work which are necessary by other scanners. With the patented Context technology become white point and black point, as well as the Stitching of the cameras supervises constantly and corrects during your scanner operates.

Scan at the touch of a button

The operating surface of the scanner contains programmable action keys for starting often required functions directly in the scanner. Each of these keys begins a Scan and opens the picture in a suitable use in the suitable format. The scanner has keys for scanning, copying and for the dispatch by e-mail of the loaded original.

Advanced power management

The internal temperature of the device is to be achieved while scanning of extreme importance around qualitatively

high-quality results. The Advanced power management system brings the scanner fast on his optimum operating temperature and supervises them then in view of the slightest rushing CCD. Moreover, the system allows to you to begin automatically the scanner, so that he expects you in the morning already warmgefahren. The Cougar 36" large size-colour scanners is based on the newest Imaging technology. The big 36" - abbot branch area is suited for poster, architecture drawings, detailed maps and art reproductions equally. These scanners are a reasonable solution for repro's graphs, graphic artists and G SHARP and CAD pros.
