XL 42" large size-colour scanner dispose of the newest Imaging technology on the production of qualitatively high-quality Vollfarbscans and copies.

Functions

- Scan
- Copy
- Put into archives
- Reproducing

Target group

These scanners are the professional solution for repro's graphs, graphic artists and G SHARP and CAD pros.

The CHROMA XL 42" large size-colour scanner disposes of the newest Imaging technology on the production of qualitatively high-quality Vollfarbscans and copies. 42" (106.7 cm) of wide scan area is suited equally for coloured posters, as well as architecture plans, maps, photographs and art reproductions.

Colour data are read in with 48 bits from what the best 24 bits are transmitted to the calculator. Horror step data are read in with 16 bits and the best 8 bits and the calculator are transmitted. The CHROMA XL 42" offers so the best quality with excellent speed.

The CHROMA XL 42" orders more than four CCD lines, three for normal RGB-Scannen and a special panchromatic line, it guarantees no shadings that with a Monochromscan get lost.

CHROMA XL 42" - features
