## **Hermstedt Marco ISDN PC-Card 128 kbit/pages**

non-new

With the ISDN-PC-Cards Marco and Marco SL Hermstedt also puts the standard for absolutely stable and hochperformanten file transfer for the mobile communication.

Marco's maps offer "plug&play" - complete solution for your Apple PowerBook or with Marco SL also for your notebook incl. all necessary driver and including Leonardo Internet Express (for Macintosh) or Leonardo Express (for Windows) software. Thus you can communicate with your portablen calculator also from on the way comfortably over the digital ISDN net.

Marco's maps permit quick, reliable and sure ISDN communication with digital counterplaces. Thus you can exchange with two different partners at the same time data, or couple two B canals to quick 128 kbit/pages transference.

They recognise the used file transfer protocol automatically with detailed calls. It is not necessary to fix different numbers (MSNs) for different counterplaces.

Marco and Marco SL support not only to to point point File transfer, but also IP based uses like Internet access or Remote Access for the access to distant calculators. The anew integrated fax and data modem Marco SL allows to the user now also analogous data communication to 33.6 kbit/pages as well as fax transference to 14.4 kbit/pages. Marco's maps are active adaptors with own processor. They are suited ideally for concurrent use of both B canals.

Marco - the whole world of the ISDN in the cheque card format!

### **Operational areas**

For Internet, access to distant nets, as well as for other IP based dial-up services...

For universal file transfer with Windows notebooks or Apple PowerBooks; Leonardo Express multicapable of protocol for Windows, Leonardo Internet Express for Macintosh in the scope of supply

Canal grouping of the base canals ISDN up to 128 kbit/pages

Multileft PPP Internet access with up to 128 kbit/pages; access to server FTP

Analogous data communication up to 33.6 kbit/pages as well as fax transference to 14.4 kbit/pages

### **Advantages**

An easy installation and use

Speed, comfort and reliability of digital ISDN connections

Support of several simultaneous connections

File transference ISDN to all usual counterplaces, e.g., eurofile, Leonardo... with the file transfer software Leonardo multicapable of protocol (Internet) Express

Marco SL - for Windows and Macintosh

### **Product signs & advantages**

#### **ISDN for notebooks and Apple PowerBooks**

Marco PC-Cards can be pursued with all Apple PowerBooks - Marco SL, in addition, also with all Windows notebooks. Merely a free type II Place Einsteck is necessary. The product contains all necessary drivers and software Components for the Internet access, the dialling in distant calculators or nets as well as to to point point File transference.

Also the file transfer software Leonardo Express train for Windows and Leonardo Internet Express for Macintosh are included in delivery. The licence permits the use on a device.

#### **PC-Card**

An easy installation and configuration

"Plug & Play" solution

If the drivers were already installed, can be removed Marco / Marco SL at running company from the PC-Card slot and be put into operation later also again.

#### High transference achievement

Marco's maps are active ISDN adaptors with own processor. This allows high Datendurchsatz with minimum load of the PC. About canal grouping for multilink PPP or X.Leo for file transfer 128 kbit/pages quick connections can be also built up when required and been of use. The automatic compression of Leonardo Internet Express (for Macintosh) / Leonardo Express (for Windows) delivers in the general one still significantly higher data rates by the dispatch of typical office documents or Prepress-or audio-files.

#### An easy use

The installation and configuration of Marco's maps is finished at few minutes. Then the maps can be used immediately with the usual ISDN uses, with IP based solutions, for Internet, Remote Access etc.

#### Fully "leopatibel"

File transference is with all Leonardo-and Grand Central counterplaces per, no matter whether Macintosh-based or PC-based, possibly.

With detailed calls for file transfer the used protocol is automatically recognised. It is not necessary to configure for special protocols, possibly eurofile, Leonardo or easy transfer, own MSN. With the Marco's maps all supported methods of the file transference can be unwound about a phone number.

#### to to point point File transfer

Marco's maps offer with the software Leonardo belonging to the scope of supply (Internet) Express a reliable solution to to to point point File transfer. This kind of connections offers a huge number of advantages:

Security of the connections: Spying out the transferred data is not possible.

Quick and reliable transference: As soon as a transference was concluded successfully and without error message at the transmitter, one can be sure that all files have arrived completely and intactly with the receiver. There is no risk that data are delayed in stopovers, get lost or are changed.

For demanding file transference the application of the software Grand is recommended Central Per: she offers other varied possibilities, possibly the dispatch directly from PrePress to applications, automatic dispatch by means of HotFolder...

#### Mobility any time

With the Marco's maps you can also use on the way any time the advantages of ISDN: fast data transfer, on the Internet communicate, stock market information calls away or selects simply electronic news from on the way. Just for photographers and reporters the Marco's maps are universal tools. In no time topical picture information or text contributions on Macintosh PowerBook is edited and sent thanks to Marco / Marco SL to the agency or editorial staff. The stable company and the speed of ISDN can provide here for the important time projection in the topical reporting.
