

PDF Enhancer

With PDF Enhancer many PDF-treatment duties can be solved elegantly. The independent programme serves the optimisation and adaptation of PDF documents for certain intended purposes and offers primarily for the area of the in colour processing of PDFs for different pressure standards and printing methods a few exceptionally interesting functions to too much favorable conditions.

PDF Enhancer in particular also offers functions to the automation of certain duties which are not to be found thus in other programmes - in particular not in Adobe Acrobat themselves.

Colour conversion and colour-adaptation

PDF Enhancer version 3 offers in the area of the in colour adaptation of PDFs amusing new functions which make the tools an efficient and reasonable "colour server". Thus picture data and text data and vector data can be processed apart of each other. Whether RGB-zu-CMYK or CMYK-zu-CMYK - PDF Enhancer delivers optimum results for both areas. Besides, the product works with ICC profiles, however, also with DeviceLink profiles which offer further possibilities with CMYK for adaptations CMYK. The support for PDF / X output Intents, special treatment of RGB black, free choice to verwendenen Rendering Intents, depth compensation, the retention of 100% of pure colours, 2-coloured to built up colours (CM-CY-CK-MY-MK-YK) - it no wishes stay open.

- Farbraum-Konvertierung between RGB - CMYK - grey
 - Separate treatment of picture and vector objects and text objects
 - CMYK for conversion CMYK with retention of the black canal
 - Support of ICC profiles and DeviceLink profiles
 - Free choice of the Rendering-Intents for source profiles and aim profiles
 - Change of RGB grey in grey, CMYK or Spot-Black
 - Imbedding of the aim profile as a PDF/X output Intent
 - Tiefen-Kompensierung
 - black canal receive with CMYK2CMYK
 - Preservation of 100% of pure colours (C-M-Y-K)
 - Preservation of primary colours (sound values of only C in each case, M, Y or K)
- Preservation of 2-coloured built up colour combinations (CM-CY-CK-MY-MK-YK)
- Change of jewellery colours in CMYK
- and more.

Optimisation of PDF files

Many PDF documents are easy too largely or contain undesired information or elements because they were put on originally for quite an other purpose or because the PDF-production programme offers no optimisation. The PDF Enhancer optimises the files for exact the intended purpose for which you need them. Thus the optimisation of PDFs for the pressure, for the quick web announcement or for the email dispatch is no problem.

The file optimisation offers you comprehensive control of the document elements to be optimised: Thus not only embedded pictures can be reduced, but be extinguished, for example, also Bookmarks and many others - perhaps, annoying - elements. Precast sets make easier the work with standard duties. Their self-defined optimisation can be stored of course and been of use in future automated.

- Analysis of the used objects
- Optimisation by removing certain objects
- Distance of Metadaten, precharts, bookmarks, links...
- Removing grandpa's comments
- Compression and new calculation of picture data
- Change, extinguishing and generation of media, Trim-, Bleed-, Crop and kind box frame

Writings

- Imbedding of writings
- Imbedding as written sub-groups

- Change in Outlines (sign paths)

Security functions

Often it makes sense to equip PDF documents before the passing on into three parts with security functions: thus it can be prevented, for example that the document can be printed out. PDF Enhancer offers here a rich choice of suitable functions:

- Document may be printed, but not be changed
- For opening a code-word is questioned
- Remarks may be added
- All current security settings of Adobe Acrobat are supported

Side announcement, creation and subsequent treatment

PDF Enhancer offers the possibility to join PDF documents (or single sides from it) to new documents, to work with stamp tools or to carry out a side assembly with different small PDF documents. With it you win even more freedom in dealing with PDF documents which you would like to work on and manipulate.

- Change of the side announcement options and representation options
- Documents or single sides from PDF documents bring together
- Stamps define and raise on the document
- layout manager for the side assembly (e.g., 8 calling cards on a DIN-A-4-Seite arrange)

Conversion

The PDF Enhancer permits furthermore the conversion of current graphic arts formats in PDF. Belong to the supported formats: TIFF, PNG, JPEG, PSD (photo shop files) and EP (only under Mac OS X!).

Automation

All manipulations which you can carry out with a huge number of parametres individually are put or are adapted. If you liked to carry out certain working steps over and over again, they can be stored in a Droplet. In future you must pull the file to be manipulated then only with the mouse on this Droplet and afterwards the predefined actions are automatically explained. For a further automation one falls back on supervised Hotfolder which are offered in the "professional" - (maximum 3 supervised folders) and the "server" versions (unrestricted number Hotfolder) by PDF Enhancer. Under Mac OS X can be used for the automation mechanism also the "folder actions" specific for operating system or Automator (from 10.4).

Different versions

PDF Enhancer is available in three versions with different achievement extent, state kind, professional, server and Advanced server.
