Dr. Bott VGA Extractor

For the operation of two VGA monitors to PowerMac G4 (silver, from February 2002) and Power Mac G5 (aluminum, from summer 2003)

Also compatible with the ATI Radeon 9000 and nVidia GeForce 4 Titanium cards and Apple TwinView card in the G4 800 DP!

VGA monitors in a twin - VGA Extractor saves the second graphics card!

In early 2002 Apple provided with the Power Mac G4 with 800, 933 MHz and 1 GHz dual processor with a full lineup of built-in support for the connection of two monitors.

Both the ATI Radeon 7500 and the nVidia GeForce graphics card depending 4MX offer an ADC and a VGA port, both of which are active simultaneously.

Later G4 PowerMacs have to offer with ATI Radeon 9000 Pro and nVidia GeForce 4 Titanium card fitted, the same active ADC and DVI connectors.

The current Power Mac G5 models called dual-head graphics card with ADC and DVI port - ATI Radeon 9600 or nVidia GeForce FX 9800 and 5200 Ultra.

In this way, an Apple Studio Display and a conventional VGA monitor (with DVI-port cards are usually supplied with a VGA adapter for the DVI port) link to a related work area.

VGA Extractor allows you to connect a VGA monitor to the ADC port of all the above graphics cards. This means that you can run two VGA monitors VGA Extractor. The two monitors can be the same (it is most convenient) or different (eg, small and large for pallets and layout).

VGA Extractor is simply plugged into the ADC port and you have two identical VGA connections are available. No software, no problems.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#).
