This proven technology eliminates reprocessing the substrate void while ensuring an excellent FTB registration.

Special features: based on the Xeikon DCP 500D

unprintable margins: 25mm in total

Duty Cycle / Month: 700,000 prints

Original Price: including VAT. from CHF 845 420

Control / Digital Front End (DFE): AFCCU unit of IBM

Data stream and image objects support the AFCCU unit: is enabled only IPDS. The AFCCU unit accepts only native IPDS data streams.

The package is NOT:

The print server unit, PostScript 3, PDF 1.3, PPML, EPF, TIFF, GIF, JPEG files and integrates into IPDS AFCCU unit sends.

One such is for example IBM InfoPrint Manager InfoPrint Manager software automates the printer control, so that multiple printers can be controlled simultaneously. Using the various data streams AFP technology is accepted and the output can be in both printed and electronic form. We are interested in buying a used IBM License Manager and Infoprint interested in contacts with users, the IBM Infoprint Manager inserting.

Origin of the machine:

This machine comes from a large bank to be controlled centrally by an application using IBM IPDS printing with many units. Due to a system change - there is no need for more A2 format - the machine was free.

Recommendation:

Because we know we are not with IPDS print server units

We advise the buyer of this machine, the frontend AFCCU hochzurüsten charge on an original Xeikon X800 e. In this case, then the whole machine would be supported in any way from Xeikon. They would then be a Xeikon DCP 500D-V3 with latest Xeikon X800E front and with an alternative to buying a new Xeikon 4000, Xeikon 5000 and Xeikon 6000, when the primary concern of the paper width is 508mm.

Inexpensive alternative to Xeikon X800E upgrade:

You operate the machine with an AGFA IntelliStream workflow in which the Board BISMT have at least version 4. The 500 machine is then activated as a 50 machine. This has several disadvantages, however, may very reasonably priced. If you have such a workflow, you can try before you buy here, if you bear the cost of Xeikon engineer it. It is better to buy in any case, the workflow X800E, as is also developed by Xeikon.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#).
