High Water Quickflow

Not-New

Quickflow is a modular system which fits easily into any prepress environment. It optimizes and automates your production process and ensures data integrity thereby reducing errors. QuickFlow provides your operators with huge flexibility, repurposing and reprocessing jobs via their desktop client without having to go back to the design application to reprint the job. Quickflow standardises and preflights incoming jobs to a digital master file which can then be imposed, soft or hard proofed and approved on for final plate output.

The quality of PDF files submitted by customers for high quality print production can vary, costing your prepress department many hours of work to turn into acceptable print. Quickflow with PDF Tools removes this worry by automatically checking for and correcting problems in jobs. Quickflow will stop the job until an operator reviews the preflight report and uses the powerful Pitstop Professional editing tools to correct the problem or gives an opportunity to go back to the customer for corrections before the cost of proofs or plates has been incurred.

Quickflow's modular design adapts to the way your system currently operates. It is a robust, scalable solution that handles the most demanding prepress environments. Working with Windows and/or Mac OSX clients, it provides users with huge flexibility, repurposing and reprocessing jobs via the desktop.

Quickflow optionally normalises and preflights incoming jobs to a digital master file which can then be imposed, soft or hard proofed and approved for final plate output, all without leaving the desk.

At the heart of Quickflow is the fast flexible HighWater Torrent RIP protecting and enhancing your existing RIP investment. Quickflow can utilise Torrent, or any other Harlequin RIP, version 6 or higher for:

RIPping,

Trapping,

Imposition,

ICC based Colour Management,

Advanced screening

It can also outputs to over 180 different devices including a huge range of film and plate output devices, proofers and printers.

Features and Benefits

With its comprehensive feature set, Quickflow gives you all the benefits of an automated workflow:

- Client graphical user interface allows workflow design and job management from any PC or Mac workstations.
- Starting with two client licenses, it can expand up to a maximum of ten.
- It can support and balance up to a maximum of three Harlequin RIPs, distributed across the network.
- It uses the Torrent Harlequin RIP to output to film and plate output devices, proofers and printers.

- Multiple users can control the flow of work from their own desks.
- Flexible user permissions give greater management control and protection against human error.
- Allows for a range of access; view only login for management job tracking; full control for creating, editing workflows and deleting jobs; and many levels of permission in between.
- Integrated viewer allowing detailed on-screen soft proofing, direct to the desktop client, with variable level zoom from full job to screen dot.
- Add PDF Tools to standardise, preflight and fix files directly in the workflow.
- Keeps copies of the job at all stages of the workflow, allowing the job to be re-submitted/repurposed without have to re-print from the design application.
- Allows control of the RIP Page Setups directly from the user interface, greatly reducing the number of individual Page Setups and allowing for on-the-fly job ticket editing, giving full but flexible control.

Specification

Start today with the features your business requires and add capabilities as the need dictates. The entry level Quickflow system supports one Harlequin RIP and two simultaneous client connections to provide remote job management, software proofing and job tracking.

The PDF Tools option adds full Certified PDF workflow to Quickflow, including preflight to detect and fix common prepress problems without having to go back to the design application.

Combine this with in-RIP options such as TrapPro, Simple Imposition and proofing and HighWater applications like PixelProof (ROOM) proofing and InkMonitor (CIP3) to meet all your prepress needs.

Expand to a maximum of 10 client connections and load balance up to three Harlequin RIPs as your business expands.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
