Prinect Signa Station v1.5

Imposition and sheet assembly are among the most important process steps in preparation for printing. Thanks to increasing networking and digitization, it is now possible to make these operations very efficiently and comfortably. The version of Prinect Signa Station offers easy to understand their tools, are separated by the intuitive user interface and the proven impositioning in the folded sheet and print sheet. The distinction between printing and folding sheet offers maximum flexibility. May be rescheduled on a Speedmaster SM 102 by this distinction a job in a few seconds of a Speedmaster SM 74th Even a simple operation using a wizard that guides you step by step through the imposition process will amaze you. Marks are set automatically with the Prinect Signa Station and adapt dynamically to the paper size and the printed area. Then there is the arch optimizer which will help you make the assignment of the spread as efficiently as possible. In order to shorten the setup time in the printing and processing, provides presetting data for Prinect Auto Register, cutters, folders and saddle stitchers are available.

Components:

- 1) The Job Wizard guides you safely and quickly by any imposition.
- 2) The various functions of the Prinect Signa Station can process your orders quickly and reliably.
- 3) The imposition software offers different modes to fulfill orders quickly and reliably.
- 4) The visual representation includes the folded sheet, the sheet, a sheet list and a list of pages and their contents.
- 5) The mark editor of Prinect Signa Station, you can create your individual printing control marks and bar codes.
- 6) The order structures are clear and transparent: In a browser window which orders are created according to the production structure.
- 7) All job information at a glance: With Prinect Signa Station, they can be summarized quickly and individually.
- 8) Increased efficiency in the overall process: Prinect Signa Station provides all the prerequisites in order to shorten your job turnaround times.
- 9) With the bow optimizer, the optional tool Prinect Signa Station, you quickly create forms for collecting different sized benefits.
- 10) With the optional modules for packaging prepares Prinect Signa Station, the whole forms a complete visual inspection prior to each time for the output.

The components in detail:

- * Prinect Signa Station integrates seamlessly into your workflow. It handles PDF files.
- * PostScript files when importing the Acrobat Distiller automatically converted into PDF files.
- * Version 1.5 of Prinect Signa Station also supports the delta lists workflow
- * Output is in PDF or PostScript.
- * For job ticket-based workflows, job tickets (Adobe PJTFs) is generated.

* In workflows that are based on the JDF job definition format, such as the Printready system will output the layout in this format.

* Prinect Print Ready system uses this JDF, associates the PDF pages, and prepares the document for output.

* If necessary changes to the layout, users can interactively access of the Printready cockpit on the Prinect Signa Station. The control of the workflows is thus based on a single workstation.
