Simplify complex production methods

Narrow-web offset presses are widely used in the production of forms, direct mail, cheques, leaflets and labels; however an unavoidable weakness of this type of press is the existence of a non-printable area. To overcome this, complex production methods that are typically time-consuming and labour-intensive, are often needed. GapFinder is designed to simplify and automate such complex procedures; saving costs at every stage of the print production.

Reduce plate errors

GapFinder analyses print jobs against the printing cylinder and intelligently re-arranges the colours of the job images inside the printable area, in order to eliminate press cylinder gaps during press run. Moreover, the technology can noticeably reduce costs, simply by avoiding faulty plates getting to press. Additionally, GapFinder supports a wide range of registration marks and can also add special colour marks to the plate for correct print production.

Stand-alone or integrated solution

GapFinder can function as a stand-alone application, or it can be easily integrated to work seamlessly with existing workflows. Either way, GapFinder can save significant time and maintenance. The technology uses automated production queues and a simple interactive operator interface for more complex jobs; whilst the use of TIFF file formats also ensures data integrity and effortless connectivity.

Complementary products

Compose also offers complementary products like PlateController and Visual Proof that can guarantee maximum productivity. PlateController is a job placement solution and includes features such as double burn, step and repeat and basic imposition. Visual Proof is a powerful proofing solution that enables detailed results to be checked onscreen; even merging layers can be done at the last minute to avoid going back to the first stage to edit a job. Finally, a workflow shell can provide a fully integrated and highly automated production system for standard jobs.

ROI

GapFinder and its complementary products ensure a high level of automation and standardisation in prepress environments without compromise, and enable many of our customers to achieve ROI in a short period of time.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
