

ExtremeZ-IP 5.3

ExtremeZ-IP 5.3

New

Compatibility Without Compromise

Now achieve even greater productivity with the most advanced compatibility between Mac desktops and Windows servers.

The industry's most trusted solution for seamless file and printer sharing between Mac desktops and Windows servers, ExtremeZ-IP is the only Windows-based server software today that actively supports all Mac OS versions from OS 9 to OS X 10.5 (Leopard) and Windows Server 2008.

Backed by years of engineering and customer-driven enhancements, ExtremeZ-IP is the most compatible and stable Windows-based AFP server solution on the market – the file sharing protocol designed to fully support the Mac experience.

So join more than 3,000 other companies that now profit from best-in-class file and print sharing - with ExtremeZ-IP.

With its latest release, ExtremeZ-IP 5.3 combines file and print sharing for a completely integrated server solution. Plus, ExtremeZ-IP 5.3 provides expanded support for features introduced with Mac OS X 10.5, including the new Time Machine backup solution, file name policy enforcements, and the addition of our popular ExtremeZ-IP Zidget.

ExtremeZ-IP 5.3 delivers:

Today's most compatible, scalable, innovative AFP server, delivering world-class performance along with increased manageability and monitoring options. The first release to support Windows Server 2008, providing the most compatible file and print sharing experience for Mac clients on Microsoft's groundbreaking new operating system platform. A fully integrated File and Print Sharing Solution which combines the advanced functionality of ExtremeZ-IP File Server and Print Server into a single powerful platform for optimized compatibility between Mac desktops and Windows servers. Innovative solutions to Mac/Windows compatibility problems, designed to extend the Mac experience for Mac users when interfacing with a Windows server. Maximum performance and reliability no matter the size of your network, the number of users, numbers of files or the size of the files. Elimination of AppleTalk throughout your network infrastructure which can reduce your costs. Expanded flexibility to define and enforce file name policies on your servers for increased compatibility in Mac-Windows workflows. Simplified server administration through seamless integration with Active Directory. The only Windows AFP server that supports enterprise-class single sign-on authentication of Mac clients. Unmatched file name search speeds - search up to 150 times faster than SFM and 600 times faster than SMB. Support for clustering under Microsoft Cluster Services provides the capability for multiple virtual servers per cluster node with increased scalability. Instant discovery of all network file and print servers right from a user's desktop. Innovative "reconnect" feature of the AFP protocol, allowing a Mac that loses connectivity to the server to seamlessly re-establish connectivity, authentication, and all of its open files without data loss.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
