

SilverFast Ai IT8 Studio 6.6.0r4 für Topaz und SilverFast HDR Studio Mac

SilverFast Ai IT8 Studio for Topaz and 6.6.0r4 SilverFast HDR Studio Mac

For Mac OS X

SilverFast Ai IT8 Studio + SilverFast HDR Studio Mac

For Linotype-Hell / Heidelberg Topaz

including HDR Studio

including 5x7 "regulatory target, Fuji

including 6x7 inches-light target, Kodak

including activation IT8-Calibration

including SilverFast manual

The award-winning scanning software SilverFast from LaserSoft Imaging, Kiel, is now available for High-End Scanner & Mac OS X Leopard.

SilverFast Ai Studio for Heidelberg high-end scanner that allows the full dynamic range of its hardware into TIFF-data write. Thus, the negative reduction to 24 bit RGB obsolete. The ability to store the raw data and weiterzuverarbeiten by SilverFast HDR STUDIO opens up a whole new workflow.

Important features:

NEW: Fully Automatic IT8 Calibration

With the new version of SilverFast can also be private and professional users to concentrate fully on the correct colors and neglect the sophisticated technology behind it. Simply by the scanner is first calibrated.

The combination of automatic discovery and the context of the integrated bar code technology in LaserSoft Imaging IT8 targets the entire calibration process is completely automatic.

A pre-scan is not required. Just the original LaserSoft Imaging IT8 target placed on the scanner and start the IT8 calibration process.

Start the workflow for digital imaging with an optimal color reproduction ensures maximum color quality for output.

IT8 Targets

The high quality IT8 targets - both reflected light and transmitted light targets - makes LaserSoft Imaging IT8-production on its own. With small lot sizes is secured the highest precision.

In the SilverFast IT8 targets and patent-pending integrated bar code ensures that the reference data is identified.

New: SilverFast car frame alignment and free rotation

Especially if you are a lot of different templates on the scanner, you can find the car frame alignment, combined with the automatic frame detection, the templates with one click now not only automatically "frame" and but the images are aligned even automatically at right angles.

This task will now be conveniently done by the intelligent algorithms for detection and alignment of the frame with the utmost simplicity. In addition, the framework for the purpose of fine-tuning are simply rotated manually at any angle. The car frame alignment has been specifically designed with a very simple, convenient and time-saving scanning experience in mind.

New: An automatic color cast removal (CCR) in NegaFix

An automatic color cast removal (CCR) has been newly added to all SilverFast versions, which contain mandatory NegaFix.

With this enhancement, it is possible to achieve even color cast-neutral results. The handling is easy and is very easy by clicking the checkbox in the CCR NegaFix dialog as shown below

New: Improved descreening

SilverFast has a completely new descreening to remove the dot printed images. The newly developed descreening in SilverFast is able to scan the pattern of the template to automatically recognize.

There are 4 types of descreening made available:

- Auto descreening
- Car-intensive descreening
- descreening
- USM & Descreening

"Auto-descreening" and "Auto-descreening intensive" are full automatics.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
