

# Welke Turbo Skimmer

Non-New

I bought the skimmer is wilting in the internet shop. I then had one of the company Deltec skimmer and a ton of water lilies in my aquarium. Only after I've read on the internet forum, that is precisely the kind of lily is hazardous to health, I had to keep the plan through the skimmer of 2 Welke nitrate content as low as possible. So I then bought 2 after the same slogan the more the better.

When both were new skimmers have those great little skimmed off and are constantly overflowed. According to the wilting is because the production of very many residues in the unit. Only after about 4 weeks, both were then "run" and are no longer overflowed.

The skimmer has one but then skimmed off much the same, which was downstream of the unemployed. Finally, I built it out again and put him in the basement.

In this respect you are bidding on a "retracted" skimmer that will go well from the beginning without a 4 week waiting period.

The unit was recently upgraded with the latest silencer, with ozone hole. The unit is completely ozone according to wilt so hard. I had the muffler attached outside of the aquarium so that the cotton is damp not always as fast. In the photo he is therefore not appropriate at this height-adjustable nozzle.

I've got the equipment that is still a short time out of the pool.
