Heidelberg NexPress 2100 with air conditioning Technotrans ECS-130 Year 2003
4-color digital printing system
Heidelberg / Kodak NexPress 2100
with air-conditioning Technotrans ECS-130
Identification number GS1.011.580, 9.5 KW, built in 2003

Total count of A4 - 2,961,791 pages

+
KODAK NEXPRESS controller consisting of:
NexStation a panel consisting of approximately 1200x800 with content from:
Intel Make a Windows server with SGI special card and software for controlling the NexPress. The illustrated second identical computer with interface board is not in the scope of supply.

All CDs to reinstall the system are available. The installation was "fresh in 06.2012" re-run.
The RIP is so complete and operational. The versions and equipment, please refer to the pictures. Surely a site visit is before you buy the machine makes sense. The machine is fully installed air conditioning. A compressor is not included. The last maintenance was carried out by Technotrans and referred to the ECS 130 Unit. It was in 07.2011. A log book is available for this purpose.

There are no consumables included.

+
1x X-Rite DTP 41 automatic spectrophotometer

+
The attached pictures you can see the condition of the machine .. Without toner can not perform the service procedures. Needed simply by lapse of time or after the expiration of certain printing. The service is due procedures are performed in an image. This should be carried out after transport. The manual for service procedures provides the front end program "NEXPERT". This is part of the delivery. The concept of the NEXPRESS is it that the user can do a lot of the service procedures themselves. This is also a major argument against the manufacturer of competitive machines.

The machine has four CMYK printing units and is prepared for a 5th color. Whether the manufacturer still deliver and install this upgrade would you need to check with the manufacturer itself.

We think it makes sense that machine as a backup machine for an existing Nexpress use. All boards in the press run smoothly according to the test program. Alone, the boards have a six-figure value of spare parts.

The bus concept is that all components of the machine via a network cable from the central control computer can be booted and controlled. Thus, the connection to the RIP computer, only one network cable Cat 6 This is also known to be very, very long and can be extended via optical converter and up to 75 KM. The optical converters are obviously not there.

Dortmund, storage K7

Printing Technology:
Electrophotographic printing method
NexBlanket technology transfer
Sheetfed
Automatic reversing device

CMYK

Print speed:

2100 A4 4/4 per hour

1050 A3 4/4 per hour

4200 A4 4/0 color per hour

2100 A3 4/0 color per hour

Maximum sheet size: 350 x 470mm

Min sheet size: 279 x 210mm

Grammage: 80g / m² to 300g / m²

Resolution: 600dpi multibit

Pile Delivery: up to 600mm stack height

Dimensions and weights:

Size of the printing press: 5621 x 2002 x 1729mm (L / W / H)

Weight of the printing machine: 3843kg including ECS

Dimensions of the NexPress station: 1456 x 1070 x 1070mm (L / W / H)

Weight of the NexPress station: 200kg

Former. Price: 465,000.00 €

We are selling this machine dealers preferred to go abroad to get a dealer price of proof.

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MwSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
