

Spirometer Windmill Type Spiropet

Windmill-type spirometer

+ 44 Mouth pieces

Additional Information

Spirometer for measurement of the vital capacity

Vital capacity (VC) is the maximum amount of air that can be exhaled. There is no direct link between VK and physical fitness. However, it requires a particular lung volume to supply the body with an adequate amount of oxygen during exercise.

Some studies have demonstrated the increase of the VK with appropriate training. Changes of the VK with the age and environmental factors can be monitored by periodic VK measurements .

Measurement results with the Spiropet can be evaluated and documented with the software FUTREX Control. The Software is not included.

BRAKENSIEK®
SYSTEMHAUS

Please only contact us via our registration form and only if you are a business person yourself. Every offer is subject to prior sale and includes your acceptance to our terms & conditions [Terms and conditions \(AGB\)](#). All logos and trademarks on this site are the property of their respective owners.

You will always receive an invoice including tax, which can be paid via wire transfer, in advance or cash. If you register on paypal, you may also pay by charging your paypal account with your credit card. If you are an EU member and you have a validated tax number which can be validated here: [VIES VAT number validation / MwSt.-Informationsaustauschsystem MIAS\) Validierung der MWSt.-Nummer](#) then you pay tax-free. If you are from outside the EU, you can only pay tax-free, if the export is done with the transport company, called 'Schenker'. If you are not using 'Schenker', we cannot guarantee that we will get the export confirmation in time. In that case, you have to pay tax and you get it.
