Actually, one would think that it concerns with an empty aluminium tin a quite harmless object. If she reaches, however, in the wrong hands, it becomes sudden to an aerial which allows attacks on your network about an uncontrolled Wireless Access Point. Have employees integrated such Access Points unwittingly into your network? And even more importantly: If, yes, you would find out it? WaveRunner is checked a HP iPAQ Pocket the PC, powered by Linux with which 802.11b-installations can be determined and uncontrolled Access Points and clients who affect the achievement and security of enterprise networks. The WaveRunner of fluke Networks gets you the transparency which you need for the management of your wireless networks. With this practical tool in the vest pocket format you are informed about everything what runs off in your company. Since, finally, need for the equipment, diagnosis and servicing of your wireless connections a device which is as adaptable and mobile like you yourselves.
